Natural Gas Working Storage	2,205 bcf	▲ +63	+164	22nd	2026-05-01

Supply Balance Check

Implied weekly stock change: Production + Imports – Exports – Refinery Input × 7 days

Component	kb/d
Field Production	13,799
+ Crude Imports	+5,888
– Crude Exports	–4,840
– Refinery Input	–16,962
Implied Stock Change (weekly)	-15 mb (vs reported -7,227 mb – 7,212 mb gap, likely ...

Data Sources: All petroleum series sourced from the U.S. Energy Information Administration Weekly Petroleum Status Report via the EIA Open Data API and stored in the Thor Storehouse database (source: 'eia'). Natural gas storage from EIA Weekly Natural Gas Storage Report. Percentiles computed against trailing 5-year weekly history. Supply balance identity: Production + Imports – Exports – Refinery Input; gaps vs reported stock changes reflect adjustment factors not captured in these series.

Disclaimer: All numerical values originate from deterministic, timestamped sources (EIA). No AI-generated content. Data is believed accurate but not warranted. This report is for informational purposes only and does not constitute investment advice. Figures subject to EIA revision.
