

Oil & Gas — *Government Revenue* Link

TWO SOURCES

JUNE 07, 2026 · STOREHOUSE.DB + API.USASPENDING.GOV + DATA.SEC.GOV — FETCHED 2026-06-07 15:30 UTC

storehouse.db + api.usaspending.gov
No hardcoded figures

What this report shows: For each major oil & gas company, how much revenue comes directly from US federal government petroleum contracts vs their total annual revenue. This connects two datasets that are rarely viewed together: company financials and US Treasury spending records.

Why some companies show zero federal contracts: ConocoPhillips and Occidental are primarily *upstream* producers — they drill and sell crude oil. The federal government buys *refined* petroleum products (jet fuel, diesel, naval distillate) — not crude oil. Refiners like Valero and Marathon convert crude into finished fuels and supply them directly to the military. Upstream producers sell into the commodity market, not to the government directly. Zero federal contracts does not mean less important — it reflects a different position in the supply chain.

COMPANY OVERVIEW — MARKET + GOVERNMENT REVENUE FY2023

Stock price from storehouse.db (yfinance) · Revenue from SEC EDGAR XBRL · Federal contracts from USASpending.gov API

▪ **Highest government dependency: Valero Energy (VLO)** earned \$2.3B in federal petroleum contracts in FY2023 — 1.88% of its annual revenue. For context, most oil majors derive <1% of revenue from direct US government contracts.

▪ **Largest federal contractor FY2023: Valero Energy (VLO)** received \$2.3B in federal petroleum contracts — more than any other company in this group.

⚠ **Revenue year vs contract year may differ.** SEC annual revenue reflects the company’s fiscal year. Federal contracts reflect US government FY2023 (Oct 2022–Sep 2023). Government dependency % is approximate — useful for comparison, not precise accounting.

COMPANY	STOCK PRICE	ANNUAL REVENUE	FED CONTRACTS FY2023	GOV'T DEPENDENCY	FY2021	FY2022	FY2023
XOM ExxonMobil	\$149.92 2026-06-05	\$344.6B ▼ 16.7% vs 2022 FY2023	\$147M 73 awards FY2023	0.04%	\$11M	\$56M	\$147M

COP ConocoPhillips	\$117.14 2026-06-05	\$56.1B ▼ 28.5% vs 2022	\$0 0 awards FY2023	—	—	—	—

COMPANY	STOCK PRICE	ANNUAL REVENUE	FED CONTRACTS FY2023	GOV'T DEPENDENCY	FY2021	FY2022	FY2023
FY2023							
MPC Marathon Petroleum	\$262.01 2026-06-05	\$148.4B ▼ 16.4% vs 2022 FY2023	\$317M 100 awards FY2023	0.21%	\$12M	\$401M	\$317M
VLO Valero Energy	\$255.82 2026-06-05	\$144.8B ▼ 17.9% vs 2022 FY2023	\$2.3B 200 awards FY2023	1.59%	\$1.0B	\$2.8B	\$2.3B
OXY Occidental Petroleum	\$56.93 2026-06-05	\$28.3B ▼ 22.9% vs 2022 FY2023	\$0 0 awards FY2023	—	—	—	—

Gov't Dependency = Federal petroleum contracts ÷ Annual revenue · Trend columns = federal contract value by fiscal year

Financial data: Stock prices from storehouse.db via yfinance_loader · Revenue from SEC EDGAR XBRL API (data.sec.gov)

Contract data: USASpending.gov API — US Treasury DATA Act · NAICS 324110 (Petroleum Refineries) · Filtered by company name — may undercount subsidiaries

Limitations: Federal contracts shown are prime contracts only under NAICS 324110. Subsidiaries filing under different names may not be captured. Revenue dependency % uses approximate matching — treat as indicative.
