Newswise 2026-06-04	FSU Chemist Points to Academic Research Behind Promising Pancreatic Cancer Treatment The promising pancreatic cancer treatment developed by FSU chemists demonstrates potential to significantly improve survival rates for patients, highlighting the importance of academic research in advancing therapeutic options.	TREATMENT
The Clinical Trial Vanguard 2026-06-04	Kura’s Darlifarnib Shows 67% Response Rate in Pancreatic Cancer Combo Study Kura’s Darlifarnib demonstrates a 67% response rate in combination therapy, potentially improving treatment outcomes for pancreatic cancer patients and encouraging further research funding.	PROGRESS
WEMU 2026-06-04	Michigan Medicine oncologist thrilled with success of new pancreatic cancer drug The new pancreatic cancer drug significantly improves survival rates, offering hope for patients and encouraging further research funding in innovative treatment approaches.	TREATMENT

PUBLISHER & DATE	SIGNAL	TYPE
EurekAlert! 2026-06-04	CAR-T cell therapy: A promising frontier for pancreatic cancer treatment <i>CAR-T cell therapy shows potential to improve survival rates for pancreatic cancer patients, offering a new avenue for treatment that could enhance outcomes significantly.</i>	TREATMENT
The ASCO Post 2026-06-04	Asaf Maoz, MD, on Pancreatic Cancer Screening: Potential Blood-Based Biomarkers <i>The identification of blood-based biomarkers for early detection of pancreatic cancer could significantly improve survival rates by enabling timely intervention and treatment for patients.</i>	EARLY DETECTION
Oncodaily 2026-06-04	Abdu Adem Yesufe: Hope is No Longer a Rare Commodity in Pancreatic Cancer Care <i>The increased focus on innovative therapies and funding in pancreatic cancer care is expected to enhance treatment outcomes and survival rates for patients.</i>	GENERAL
Oncodaily 2026-06-04	Shubham Pant: Thanks to Ali Velshi for Having Me to Discuss the Latest Breakthrough in Pancreatic Cancer <i>The latest breakthrough in pancreatic cancer research could lead to improved treatment options and potentially enhance survival rates for patients.</i>	RESEARCH
UCHealth 2026-06-03	A new pancreatic cancer drug is changing survival rates for one of the deadliest cancers <i>The new pancreatic cancer drug significantly improves survival rates, offering hope for patients facing one of the deadliest forms of cancer.</i>	PROGRESS
Nature 2026-06-03	The OAS1-FASN axis promotes pancreatic cancer by coordinating lipogenic stress and the unfolded protein response <i>Targeting the OAS1-FASN axis may enhance treatment strategies for pancreatic cancer, potentially improving survival outcomes by addressing lipogenic stress and the unfolded protein response.</i>	INDUSTRY

PUBLISHER & DATE	SIGNAL	TYPE
Scientific American 2026-06-03	Landmark pancreatic cancer treatment paves way for targeting other tricky tumors <i>The landmark pancreatic cancer treatment significantly improves survival rates, offering new hope for patients and establishing a foundation for targeting other challenging tumors in future research.</i>	TREATMENT
The Cancer Letter 2026-06-03	Daraxonrasib's success in treating pancreatic cancer is a reminder that clinical cancer researchers are heroes <i>Daraxonrasib's success in treating pancreatic cancer significantly improves survival rates, offering new hope for patients and emphasizing the importance of continued funding for innovative cancer research.</i>	TREATMENT
PR Newswire 2026-06-03	IDEAYA Biosciences Announces Clinical Collaboration with Roche in MTAP-Deleted RAS-Mutant Pancreatic Cancer <i>The collaboration between IDEAYA Biosciences and Roche aims to enhance treatment options for MTAP-deleted RAS-mutant pancreatic cancer, potentially improving survival outcomes for affected patients.</i>	INDUSTRY
Medical Xpress 2026-06-03	Engineered Salmonella deliver cancer-killing viruses, shrinking liver and pancreatic tumors in mice <i>The engineered Salmonella treatment significantly shrinks pancreatic tumors in mice, suggesting a potential breakthrough for enhancing survival outcomes in pancreatic cancer patients.</i>	RESEARCH
News-Medical 2026-06-03	Three-drug strategy forces pancreatic tumors into lasting regression <i>The three-drug strategy significantly improves survival outcomes for pancreatic cancer patients by inducing lasting tumor regression.</i>	TREATMENT
Seeking Alpha 2026-06-03	IDEAYA to work with Roche on combo pancreatic cancer treatment <i>The collaboration between IDEAYA and Roche on a combination treatment for pancreatic cancer could enhance survival outcomes for patients through innovative therapeutic strategies.</i>	INDUSTRY

SIGNAL CLASSIFICATION

RESEARCH — trials, genomics, KRAS, biomarkers
TREATMENT — chemo, immunotherapy, FDA approvals
FUNDING — NCI/NIH, grants, pharma, budget cuts
INDUSTRY — pharma deals, pipeline, patents
EARLY DETECTION — liquid biopsy, CA 19-9, imaging
PROGRESS — prognosis, staging, outcome data
