NAICS 324110 — Petroleum Refineries

What this report shows: Direct federal government contracts for petroleum products — fuel purchased by the US military and other agencies from oil companies, refiners, and fuel distributors. Source: US Treasury USASpending.gov API, DATA Act public data.

What this is not: This is not subsidies, tax breaks, or royalty payments. These are contracts where the federal government pays companies to deliver petroleum products — primarily jet fuel, naval distillate, and diesel for military operations worldwide.

Primary buyer: The Defense Logistics Agency (DLA) Energy division manages virtually all military fuel procurement, making DOD by far the largest federal petroleum buyer.
